

AWETECH TREKKING POLE - 11/09

A trekking pole does not have to be a single purpose product, and having a photography and hunting back ground, I wanted more features like the Camera mount, and a yoke for long lens (or shooting) stability. And how about a big compass, so you have a feel for directions, and a 3 section design allows for full height camera use and the 7075 Aluminium spec makes them crazy strong, and how about a bag, so they are all together until I need them next? I wanted it all – and I got it!

- handy camera mount.
- 3pc, 75 - 165cm length
- 7075 high spec Aluminium
- 2 compressors per lock will take over 50KG loading each
- 2 Year Guarantee
